bolidt

Fusion Floors® Inc. strives in the ambition to develop solutions that stimulate both economic efficiency and environmental sustainability. A FusionFlex® system becomes a permanent part of the building's structure and need never to be removed, thus enhancing eco-conscious planning and LEED-certification. Surfaces are safe, nontoxic and easily maintained. At Fusion Floors® Inc. we believe a company's most important responsibility is to people and the environment. We are confident in Bolidt's endeavor to develop sustainable materials, systems and technologies that can be used to contribute to the design of cost-efficient buildings with minimal impact on the environment.

Fusion Floors® LEED - One full credit is offered by the US Green Building Council for LEED EQc 4.2:

FusionFlex® meets the testing and product requirements of the California Department of Health Services Standard Practice, CA Section 01350 Specification, for the Testing of Volatile Organic Emissions, which includes the Chronic Reference Exposure Levels (CRELs) concentrations established by the California Office of Environmental Health Hazard from Various Sources Using Small-Scale Environmental Chambers including 2004 Addenda.

Also, Fusion Floors® are easily maintained, offering the option to utilize environmentally friendly neutral cleaning products and methods which can help contribute to IEQ Credit 3.3 for Green Cleaning plan.

Fusion Floors® systems also meet ISO 16000 testing and other International criteria provided upon request.

LEED promotes a whole building approach to sustainability by recognizing performance in five key areas of human and environmental health: sustainable site development, water savings, energy efficiency, materials selection and indoor environmental quality.
